

sudell®

"Through my work as a Garden and Landscape designer I realized that there was a dearth of outdoor furniture and objects imbued with artistic flair, colour and passion. In short outdoor furniture design seems to lack heart.

Sudell has been set up with a goal of working towards creating a body of work which bridges the gap between art and furniture design, with particular focus on the outdoors - either directly through my own designs or in collaboration with others. The first design from Sudell was exhibited at Melbourne's Fringe Furniture Exhibition in 2007 "Tablecloth" is now in commercial production with other work currently in development." - Tina Sudell
